

NUCLEIC ACID EXTRACTION SOLUTION AND USE THEREOF

Abstract of the Disclosure

Disclosed are methods and compositions for extracting nucleic acids from a biological sample. In particular, disclosed is a nucleic acid extraction solution together with methods using such a solution for extracting nucleic acid sequences from biological samples containing cells, cellular debris or both. The nucleic acid extraction solution contains a molecule having the formula $R_1O-CH_2-CH_2-OR_2$, wherein R_1 and R_2 independently are selected from the group consisting of hydrogen and an alkyl group.
